

BLINDBOX™

BlindBox™ Bulkhead vs Plasterboard Bulkhead

BlindBox™ is changing the way bulkheads are created. BlindBox™ works in a similar way to traditional bulkheads providing a universal housing that accommodates most makes of blinds with added options of a closure plate to conceal the blinds further and a ceiling flange that integrates with the main ceiling.

The below table illustrates the key visual and safety differences between traditional bulkheads and BlindBox™.

BULKHEAD ATTRIBUTES	PLASTERBOARD	BLINDBOX™
Provides edge flange for ceiling	-	✓
One piece system	-	✓
Reduces point loadings	-	✓
100% secure bracket locking system	-	✓
Hides blinds, brackets & mechanisms	✓	✓
Conceals blinds 100% from sight with cover plate	-	✓
Compatible with side channels	-	-
Fits flush above ceiling	✓	✓
Ensures blinds fixed square and millimetre perfect	-	✓
Compatible with all blinds systems	✓	✓
Requires no decoration	-	✓
Reduces installation time for blinds	-	✓
Minimal dust, debris and material wastage	-	✓

We are happy to provide advice and details for any bulkhead methods on projects. Please contact us to discuss specifications and options available to you.
