

BLINDBOX™

The unique universal blinds bulkhead

What is BlindBox™?

BlindBox™ is a fresh view on the traditional bulkhead constructed in timber and plasterboard and then decorated. BlindBox™ works in a similar way by providing a universal housing that accommodates most makes of blinds with added options of a closure plate to conceal the blinds further and a ceiling flange that integrates with the main ceiling.

BlindBox™ provides a secure fixing with bracket locks to suit Armour systems.

BlindBox™ is a one-piece aluminium profile conferring the further benefits of a clean, sophisticated finish, significant savings on installation time and cost effectiveness and a reduction in site waste.

How does BlindBox™ work?

BlindBox™ is designed to be installed to a completed shell before ceiling construction.

When installed, BlindBox™ creates a universal recessed housing concealing the retracted blinds and provides the perimeter ceiling edge in one integral profile. With no further requirement for drilling on site the blinds are simply and cleanly fitted just before handover.

 BlindBox™

We would be probably saving 75% of the time that we would have spent doing it in a traditional way with bulkheads

Site Manager, Major Construction Company

AESTHETIC

EFFICIENT

- \ Neat finish
- \ Hides hardware
- \ Blinds roll up completely to ceiling level

The sleek housing formed by BlindBox™ conceals the retracted blinds, brackets and mechanisms leaving a clean finish and the blind totally inconspicuous when raised.

1. Fits flush with ceiling level
2. Provides edge flange for ceiling
3. Hides blinds, brackets and mechanisms
4. Single piece finished solution (see p6 for main configuration details)
5. Cover plate conceals blinds
6. Ideal for use with motorised and BMS systems

75% FASTER INSTALL

over traditional bulkhead

With a 75% saving on labour time over constructing and decorating a bulkhead in the traditional way, you can bring your whole project forward.

- Single piece solution is fast to install
- Saves constructing and decorating bulkhead
- Dry solution, no wet trades
- Also cuts installation time of blinds

EFFECTIVE

- ✓ Cost effective
- ✓ Safer bracket

BlindBox™ represents a significant saving in on-site time and cost and for this reason alone is installed as a continuous ceiling perimeter both where blinds are and are not required.

BlindBox™ bracket-locking system works with Armour systems to secure the blind support brackets eliminating the risk of them being pulled out, and fixings the whole width of the blind dramatically reduce fixing point loads.

- Decrease site labour and hours
- Less wastage and excess material
- One-piece profile combines bulkhead and perimeter trim
- Brackets locked into BlindBox™ (on Armour systems)
- Brackets square and millimetre perfect
- Removes reliance on installer
- Reduce point loadings

BlindBox™ will enhance your project with its speed of installation, aesthetics, less mess and cost saving features. BlindBox™ replaces the traditional bulkhead by providing a universal housing that suits blinds from most manufacturers with many benefits for the Specifier, the Contractor and the Client.

BlindBox™ Specification

K40 260 PERIMETER TRIMS

Manufacturer:

Armour UK | Tel: 08453 83 83 83 | sales@armour-uk.com

Type:

Armour Recessed BlindBox™ to provide housing and secure fixing for window blinds;

- CFWF (with ceiling and wall flanges)
- CF (with ceiling flange)
- WF (with wall flange)
- NF (with no flange)

Closure plate options as below;

- With front fitting closure plate on an internal fixing to conceal blinds
- With rear fitting closure plate on an internal fixing to conceal blinds
- With no closure plate

Material:

Manufactured from 6063 aluminium and polyester powder coated. RAL 9010 30% Gloss.

Fixing:

Fixings are to be selected and supplied by the appointed specialist ceiling contractor. Fixing centres maximum 1000mm

Technical Configurations

BlindBox™ with Ceiling and Wall Flanges

Face fixed option with ceiling flange to provide lip for the ceiling. Diagram shown with front fitting closure plate.

BlindBox™ with Ceiling Flange

Top fixed option with ceiling flange to provide lip for the ceiling. Diagram shown with front fitting closure plate.

BlindBox™ with Wall Flange

Face fixed option with no front ceiling lip. Diagram shown with front fitting closure plate.

BlindBox™ with No Flanges

Top fixed option with no front ceiling lip. Diagram shown with front fitting closure plate.
