comfy_

A high quality acoustical curtain fabric with a sustainable footprint. Comfy has a beautiful, quilted woven structure on the front and a fleece look-a-like back. Thanks to the rich structure, the deep colours stand out beautifully. To produce Comfy, used plastic PET bottles are collected and transformed into reusable polyester yarns. The process is significantly more energy-efficient than for virgin polyester and reduces the use of natural resources. Per square metre, Comfy contains no less than 9 used plastic bottles.
